SUMMARY

I'm a full-stack developer with over three years of experience building and improving web applications, primarily with PHP, Laravel, and MySQL. I've worked on everything from payment processing and application security to database optimization and dashboards that turn complex data into useful insights. I enjoy solving problems that go beyond getting a feature to work. For me, good development means building systems that are reliable, maintainable, and ready for the challenges of real-world use.

EXPERIENCE

Full-Stack Developer · Hair Rap by YoYo Pvt Ltd JUL 2025 – PRESENT

- Took ownership of building DonateBazaar, a fundraising platform developed from the ground up. Worked across the application's backend architecture, database design, business logic, and core features, building a foundation that supports its growing functionality.
- Built a secure, five-step Razorpay payment flow that handles payment verification, webhook events, duplicate requests, and refunds, helping ensure donations are processed reliably and financial records remain consistent.
- Strengthened application security with 18 implemented controls, covering CSRF protection, rate limiting, role-based permissions, KYC verification, account-status checks, and audit logging.
- Integrated an AI-powered support chatbot using Anthropic Claude to help donors find answers to common questions quickly and make the donation experience more accessible.
- Set up background email processing for welcome messages, donation receipts, campaign updates, and security alerts, allowing routine communication to run without slowing down the main application.

Software Engineer · Infomaticae Technology Pvt Ltd DEC 2023 – JUL 2025

- Contributed to the development and maintenance of multiple web applications, including Tata Pravesh and its lead management platform, Lead Tata Pravesh, building and enhancing features to support business operations and user workflows.
- Developed backend functionality using Laravel, PHP, and MySQL, translating business requirements into reliable application features while maintaining existing systems and improving overall application stability.
- Optimized database schemas, SQL queries, and indexes to improve application performance, achieving an approximately 40% reduction in query execution time in the areas optimized.
- Integrated third-party REST APIs and strengthened error handling, logging, and failure recovery to make integrations more reliable and troubleshooting more efficient.
- Worked closely with the development team across requirement discussions, sprint planning, code reviews, testing, and releases, helping deliver features on schedule while maintaining code quality.

Developer · Alongkari CONTRACT FEB 2024 – FEB 2025

- Developed and maintained WordPress websites using custom themes, plugins, and page builders.
- Customized website layouts and functionality to meet client requirements and improve user experience.
- Built responsive, user-friendly web pages optimized for desktop, tablet, and mobile devices.
- Integrated and configured WordPress plugins for forms, website functionality, and content management.
- Managed website updates, troubleshooting, and performance improvements to ensure smooth operation.

Junior Web Developer · FliqaIndia MAY 2022 – DEC 2023

- Developed and customized WordPress websites using themes, plugins, and page builders.
- Created responsive website layouts using Elementor, HTML, CSS, and JavaScript.
- Integrated and configured WordPress plugins to deliver client-specific functionality and improve user experience.

SELECTED PROJECTS

Tata Pravesh Laravel · PHP · MySQL tatapravesh.com ↗

Live production site serving the Tata Pravesh brand

Lead Tata Pravesh Laravel · PHP · MySQL lead.tatapravesh.com ↗

Live platform at lead.tatapravesh.com

Jewelbox Next.js · Headless WordPress jewelbox.co.in ↗

Production e-commerce site at jewelbox.co.in

Paris Beans React · Vite · Framer Motion parisbeans.vercel.app ↗

Live at parisbeans.vercel.app

Vehicle Theft Analysis PostgreSQL · Power BI · DAX

Found a 70.6% rise across monitored regions

Blinkit Sales Dashboard Power BI · DAX

Custom KPI definitions and live tracking

SKILLS

Languages and Frameworks: PHP, Laravel, JavaScript, HTML5, CSS3, SQL

Databases and Data Modeling: MySQL, MariaDB, PostgreSQL, ER Modeling, Database Indexing, Triggers, Schema Design

Payments and Integrations: Razorpay, RESTful APIs, Anthropic Claude API, Webhooks, Payment Verification, Refund Workflows

Security Engineering: CSRF Protection, HMAC Signature Verification, Role-Based Access Control, Middleware, KYC Workflows, Rate Limiting, Audit Logging

Data and BI: Power BI, DAX, KPI Reporting, Data Cleaning, Dashboard Development, ETL Fundamentals

EDUCATION

B.E. / B.Tech, Electronics and Electrical Engineering 2017 – 2021

KIIT University · Bhubaneswar, Odisha · 71.6%

Class 12 (Higher Secondary) 2014 – 2016

Birbhum Zilla School · Birbhum · 72.6%

Class 10 (Secondary) 2014

Birbhum Zilla School · Birbhum · 86%

CERTIFICATIONS & LANGUAGES

Power BI Certification (Basic to Advanced)

Rajdeep Dar Pathshala

Languages

Bengali (Native), English (Professional), Hindi (Fluent)
